MARCH 1992  
DAILY RECORD OF EVENTS

**31**  
TUESDAY  
91st Day 275 Left  
Week 14

( 6:15 - 5:30 )  
- prepare for Hecla mtg.  
in box review  
- place few phone calls

**(M)** ( 10:30 - 12:15 ) STATE HEALTH (DWQ)  
Gary Gamble, David Dewey & HECLA  
(Hecla) + Kevin Ranch (Attorney)

- Asked Gary Gamble for copy of their formal response to BLM EA & Sops. Revised Plan does reflect most of BLM requirements according to Mr. Ranch.  
\* My scheduled to discuss DWQ's latest technical concerns & GW Discharge permit application requirements.

- Gave Gary copy of Tony's Dec/91 bond estimate as he wants to post a replacement form of surety to replace the existing CD.

- Told Health we believe most of our remaining concerns have been addressed & will get formal response to them by end of April.

- Gary stated didn't expect to be able to schedule the reclamation until next year (93). By end of April/92 they plan to have polymer reapplied to tailings pond for dust control.

\* Hydraulic conductivities, flow direction, <sup>new</sup> map, <sup>new</sup> samples and new water level measurements.

\* Spoke w/Fred Peterson about affect of GW Discharge permit requirements and timing of reclamation. He didn't believe the GW Discharge permitting should prohibit or impact implementation of reclamation plan.

**A** - Wayne to call DWR on their review of Hecla response to their concerns (is it adequate)??
